

STOCEXPO 2010

Europem booth 136

EUROPEM NV is a very reliable authority in this industrial area and has collected its know-how and experience in the course of the past 35 years, through the discovery of solutions for environmental, and energy and process related projects.

Europem NV has a good position to provide local engineering, designing, manufacturing and project management of combustion systems from its HQ in Lier Belgium.

EUROPEM NV is specialized in advanced systems for the treatment, combustion and energy recovery of waste gases and volatile organic compounds for industrial processes and **offers a new product line for the safe displacement and thermal treatment of VOC's coming for loading and storage facilities.**

The system is a TÜV approved vapour treatment concept: a combination of Zone 0 displacement system with dynamic flame arrestor. This vapour treatment concept meets the highest demands on emission, they run with the highest efficiency and are designed according to the ATEX directives.
