

press release

StocExpo Europe 2010

30. March – 1. April, Antwerp

SZE HAGENUK
Safety Culture

Leak detection *unlimited*

headlines the presentation of SZE Hagenuk GmbH at Stocexpo 2010. Leacom[®] is the already wellknown possibility of multiple leak detection and location of all kinds of fluids, nearly everywhere. Just installing the unit, fixing the jumper cables and sensors /sensor cables. Switching on the power supply (or gaining the needed energy from a solar panel/fuel cell) and starting the system by taking the first „electrical picture“ of your application and leaning back. Leacom[®] will guard your investments 24 hours a day, 7 days a week. If anything unregular happens (leak, break, fault) it will tell you immidiately and –if you want to- it will start first steps to avoid further mistakes. For the first time, SZE Hagenuk GmbH presents possibilities to control and remote your application from wherever you want, whenever you want. The embedded Leacom[®]-solution offers the network-based linking between the Leacom[®]-components and controlrooms, pc's, messaging-units, cameras etc. Join the comfort to read realtime-datas or watch realtime pictures directly on your smartphone and communicate with your application. Right now, you are no longer forced to inspect your application at its location, pick up your application into your pocket and rule it *unlimited!*

Let's talk at stand #102!
