

Rala respond on the internationalization of the industrial market

Following the creation of Rala Productos Técnicos SLU (Spain) in January 2009, Rala also commits now to supply the Benelux market from Belgium.

This European position was necessary to respond on the increasing demands of industrial procurement the last years.

So many times we have been involved in European procurement, mainly issued by German companies, with the aim to supply their European subsidiaries.

In Antwerp, Rala acquired 74% of the shares from INTERSEAL. INTERSEAL is a specialist in sealing technology, a key area in the range of Rala and therefore already well established in the market. Other major product groups such as flexible hoses and couplings, safety equipment / clothing (PPE) and chemical-technical maintenance products, complete the range of RALA INTERSEAL, offered now from Antwerp and delivered throughout the Benelux market.

With 230 employees, annual sales of more than 50 million Euros, offices in Ludwigshafen, Heilbronn, Sitges (Spain) and Antwerp, we guarantee our customers the best quality and service, this in full accordance with the latest techniques.

More details at: www.rala.de

We look forward to your requests.
