

Synergy in Safety

This year two fire protection companies join forces for the first time for the outside world to see.

The Dutch fire protection company **Saval**, which has been an exhibitor at StocExpo Europe for years now, will be joining forces with sister company **Knowsley SK** from Manchester UK. Although **Knowsley** has been around for years, they have yet to experience the added value of an event such as StocExpo. To get acquainted with the BENELUX-market, the promotional co-operation between the two seemed the logical step.

With the combined product-range of **Saval** and **Knowsley**, StocExpo has found a solution for many of the exhibition's visitors in terms of tank fire protection. Instead of overlapping, the assortments of these companies complete each other so that spaces 5, 6 & 7 now accommodate a powerhouse in fire protection solutions for this specific, but billion dollar industry.

About Saval:

Since its foundation Saval has extended its area of operations throughout the world. With branches in the Netherlands, Belgium, the United Kingdom, Saval is a highly competitive producer and supplier of fire protection equipment and systems to customers on all continents. Saval offers a remarkably full range of products and services, from hand-held extinguishers to automatic fire-fighting installations and fire and gas detection systems, up to water and foam monitors, foam mixing systems, hydrants and fittings and a wide variety of nozzles. Design, installation, service and maintenance are all services which are performed by Saval. Saval has around 200 motivated employees constantly working to provide a wide spectrum of business contacts with the best in the area of fire protection.

About Knowsley:

Across the modern world, the Knowsley SK name is renowned for the design, manufacture and delivery of innovative fire fighting systems for the protection of high value Oil, Gas & Petrochemical installations.

Knowsley SK Ltd has an enviable reputation for finding the complete fire fighting solution that incorporates highly reliable systems & equipment for use in all manner of harsh environments.

We manufacture and supply products into the - 50°C extremes of mid-winter in the Caspian region and also to the +60°C summer heat of the Middle East.

Add over a century of expertise, continuous product development, plus the backing of a worldwide support network, and Knowsley SK is the first choice for high-value asset protection, with optimum solutions that can be relied upon whenever danger strikes.
