

We take care of
Your automation projects

from high tension to indicator cable, from sensor to ERP.

Avalon Automation is a young dynamic company established on 4th May 2004. We are mainly active in **petro, chemical and petrochemical sector:** engineering and construction.

- Avalon does the **engineering from Greenfield**, the construction with partners, and the commissioning of tank storage plants.
- Avalon has developed own software platform for the treatment of heterogeneous data: **IDAS®**.
- Avalon has developed an open and configurable MES layer and TAS solution for tank storage activities: **ALIAS®**.
- Avalon configures and integrates a variety of tank gauging systems.
- Avalon takes care of writing functional descriptions, programming controllers, creating scada, ...
- Avalon chooses frankly for **quality and safety**.
- Avalon has a lot of customers in the harbour of Antwerp and Ghent (Belgium), and **international** too, among in Asia.
