International Paint to showcase cost saving Envirolin[®] Linings at Stocexpo

Visit booth 14 to see Envirolin's range of linings for fast return to service

Visitors to 2010's stocexpo exhibition in Antwerp will have the first opportunity to learn about a new tank and vessel internal linings range which promises cost saving fast return to service times, high temperature resistance and corrosion protection for their assets.

Visit International Paint, booth 14 at the show, and learn about the Envirolin linings range and the many advantages it provides:

Fast Cure

Envirolin products cure within hours rather than days in ambient conditions. This fast cure advantage substantially reduces the costs associated with a tank, pipe or containment area being out of service by allowing tank refurbishment to take place during short shutdown periods, reduce total shutdown time and also help ensure shutdowns are completed on time.

Fast Application

Envirolin thick-film coatings and linings are applied in a single thick coat decreasing labour cost and increasing the speed with which the tank is returned to service.

Ultra Low VOC's

Little or no VOC's (volatile organic compounds) makes these coatings less hazardous to apply and helps contractors and owners meet environmental regulations.

Chemical Resistance

Envirolin coatings and linings offer excellent chemical resistance for continuous immersion in harsh environments, including 98% sulphuric acid, 36% hydrochloric acid, potable water and sweet and sour crude oil.

The Envirolin product range is part of the International Paint's extensive product offer of protective coatings. Coating structural steel buildings, stadia and bridges as well as offshore installations, industrial power plants and mining operations, the product offer includes a linings range from Envirolin and Ceilcote products, innovative finishes and leading fire protection materials.

Protective Coatings

International Paint Ltd. is part of AkzoNobel. AkzoNobel is proud to be one of the world's leading industrial companies. Based in Amsterdam, the Netherlands, we make and supply a wide range of paints, coatings and specialty chemicals - pro forma 2007 revenue totaled €14.4 billion. In fact, we are the largest global paints and coatings company. As a major producer of specialty chemicals we supply industries worldwide with quality ingredients for life's essentials. We think about the future, but act in the present. We're passionate about introducing new ideas and developing sustainable answers for our customers. That's why our 60,000 employees - who are based in more than 80 countries - are committed to excellence and delivering Tomorrow's Answers Today™. <http://www.akzonobel.com> <http://www.international-pc.com>
