

OKZ HOLDING a.s. – PRESS RELEASE

Visit us at StocExpo 2010 at stands 124, 125, 138, 139!

OKZ HOLDING's long-term focus rests in complex types of supplies for petrochemical and chemical industry, bio-fuels production, and, more recently, also for energy industries.

The key production plan of the company consists of large-capacity storage tanks for crude oil, petroleum products and chemicals delivered on the turn-key basis. OKZ also manufactures and installs steel structures and technological pipelines. Within the frame of storage tanks construction, OKZ provides design, delivery, assembly and service of fire-fighting systems.

OKZ HOLDING offers its clients a comprehensive project and engineering services in the construction of storage tanks, storage fields and technological investment units. All goods and services supplied are provided with guarantee and post-guarantee service.

In 2009, OKZ confirmed its strong position on the markets where the company is already operating and significantly reinforced its market position in Western Europe. In the Czech Republic, OKZ completed the delivery and erection of giant absorber and chimney for Plzenska energetika and works on the construction of butadiene production plant in the city Kralupy. Major contracts have been concluded for storage terminal construction and storage tanks erection for Belgian and Dutch investors. OKZ HOLDING has also extended its activities in to the France and its overseas departments and has opened there new subsidiary company.

This year OKZ HOLDING celebrates a 10 years of successful operation on the market. Within the time, company managed to build a network of 12 subsidiaries, including 5 production plants and nowadays operates in 8 European countries and Russian Federation.
