

Satam is now 99 years old and shall stay confined!

But this old lady, who has been through so many things all in her life, has never given up, and as the indomitable Gauls, our team is still struggling every day at home or at the factory. We are glad to keep serving our clients during this period.

The photo below is our team working in the factory. We would like to share our solidarity with all the people who are going out every day trying to save our life or simply go out to work to ensure our companies keep alive.

Thank you and keep safe,

The SATAM team
